

To whom it may concern:

I wanted to voice my support for XM radio. The variety and type of programming is unsurpassed and I pay for this service. Obviously, if I liked what was on regular FM and AM stations, I wouldn't need or desire XM radio.

Since I pay for this service, I believe it is not the NAB's decision to tell me what and what I cannot listen to. Competition is indeed healthy and needed in this industry.

I listen quite frequently to the local traffic and weather stations since I am an outside sales rep and travel quite extensively throughout the state of Florida. These stations are helpful, informative and necessary for me and the amount of travel that I incur day-in and day-out.

I implore the FCC to reject NAB's petition 04-160 and to support XM radio and its programming. I do. It's an intricate part of my daily life and activities and I want to see it stay. Thanks for your time and consideration.

Sincerely,

David Eatmon
